GOALS

The **Financial Astrology** course, by C.E.I.A. Research, aims to provide financial investors - amateurs and professionals - with a new, supplementary and more accurate approach for their market analyses, in terms of cyclical patterns, both in the short and the long run.

The contents of the course is based on the experience and research made by **professional astrologer** João Medeiros in Mundane (Collective) Astrology over the past two decades and over four special editions of the Financial Astrology course, from 2023 to 2026.

The main focus of the course will be to present the **clear cyclical patterns of the S&P 500** index in the past and to project these trends into the future, in yearly and monthly forecasts, according to planetary and lunar cycles. These patterns also apply to other major world stock indexes and therefore to the trends of the world's main stocks.

As a secondary goal, the course will provide similar forecasts for **specific markets** such as cryptocurrencies, fiat currencies or others such as some commodities. Exceptionally, prominent companies will be used as case studies.

This approach is about a **spiritual and ethical** insight of investments, perceived as a way to boost special projects, companies or markets and as a means for individuals to achieve greater financial freedom and abundance.

This course is **unique in the world** in the special modern and traditional techniques on which it is based and is designed to enable students to understand the major practical conclusions despite having no previous knowledge of Astrology or experience with investments.

"Besides the timing information - very useful for short term and long term investors - the main benefit of this course, in my opinion, is João. He is an incredible teacher, an amazing professional, an analytical mind like no other. He brings together the world of Science and Esoteric knowledge. And the group he gathers is just incredible. "

Ana M. - Marketing Consultant

"Simple to understand and cut to the chase. João was always available In the telegram group to answer our questions, relate them with the course teachings and evaluate monthly the results of the forecasts. In the second edition, he was able to fine tune it and make it even more reliable. "
